KEY BENEFITS

- World's slimmest RFID as EAS reader combines state-of-the-art RFID technology with sleek design for optimal performance
- The first and only RFID as EAS system with time-of-flight sensors to accurately determine the speed and direction of RFID tag movement
- Retailers can more easily interpret system alarms and determine if an item is being stolen
- Fully integrated Bluetooth for real-time data transfer and advanced inventory reporting capabilities
- Discreet design that is non-intrusive to shoppers and retail environments with wall mount or ceiling suspension option
- Custom designed and manufactured in Europe utilizing high quality materials
- Easy to use dashboard for on-site management
- Quick and simple synchronization and tuning
- Remote diagnostics and maintenance over IP result in less downtime for retailers and ensures highest possible system performance
- Multi-mode transmitter synchronization with Sync-on-command
- Multiple band tuning capability
- BLE to pair mobile RFID readers
- Dual relay alarm outputs for external triggering
- Network connection and I/O port for connecting to surveillance video or other LP systems
- 2 year limited warranty: parts and labor
