

SafeLOK[®] VT

SECURITY OF THE SAFELOK WITH THE CONVENIENCE OF AN EXTRA POCKET

SafeLOK VT (Vertical Twin) offers the same security and ease of use of our ever-popular SafeLOK while adding one more pocket for checks and deposit slips. Separating cash from checks can mean quicker processing by your bank, and quicker funds availability for you.

BENEFITS

1. Maximum security ensuring unmatched protection for your cash while showing immediate signs at tampering to deter and prevent cash.
2. Vault Process Certified (VPC) film contains unique additives that allow for thinner walls without sacrificing the strength of thicker bags. The result is a lighter bag that saves money on shipping weight and has a lower impact on the environment.
3. Specifically formulated to withstand the vigor of cash vault and armored truck environments, filled bags can be palletized without the risk of sliding and bursting.
4. GS1 barcodes for Cash Visibility compliance and allowing for greater transparency and efficiency throughout the entire cash cycle.

STOCK NO.	DESCRIPTION	CAPACITY
585095	13.5" x 10" clear	Horizontal twin (dual deposit)
585092	10" x 15" clear	Vertical twin (dual deposit)
585096	14" x 20" clear	Vertical twin (dual deposit)

Available in a variety of stock and customized options including: opaque or clear film, pockets for deposit tickets and checks, dual pouches, sizes, and custom printing.

SafeLOK® VT

FEATURES THAT DETER THEFTS, CLEARLY SHOW SIGNS OF TAMPERING & SPEED UP CASH HANDLING PROCESSES

FEATURES THAT PREVENT THEFT

Unrivaled Tamper-Evident Tape

SafeLOK VT's adhesive spans the entire width of the bag, and combined with its fold-over closure, it ensures there are no vulnerable openings, making contents completely secure.

Pull & Open Detection

SafeLOK VT's adhesive spans the entire width of the bag, and combined with its fold-over closure, it ensures there are no vulnerable openings, making contents completely secure.

Fluid & Chemical Detection

Security message smears at fluid & chemical exposure.

Complete Temperature Protection

SafeLOK VT's tape seal is equipped with the industry's widest temperature range, displaying a void message from -130°F (-90°C) to +176°F (+80°C), ensuring comprehensive protection from heating or freezing attempts.

Freezing Attempt Detection

The seal disintegrates when subjected to extreme cold temperature, making tampering immediately noticeable. Once exposed, the bag cannot be resealed without leaving evidence.

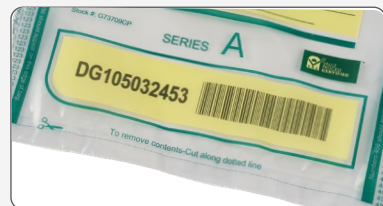

Heat Attempt Detection

Upon exposure to extreme heat, a visible red line will appear, indicating evidence of tampering with the use of heat.

Cut & Seal Detection

Indented side weld & security border make it virtually impossible to reseal.

Seamless Bottom

Folded bottom cannot be cut and resealed, requires puncturing to open.

FEATURES THAT IMPROVE CASH HANDLING

Anti-Static Liner with Tab

Prevents clinging to hands & clothes and added pull tab speeds up sealing.

Large GS1 Compliant Barcodes

Multiple large serials and GS1 compliant barcodes for easy scanning and tracking.

Vault Process Certified

Ensures consistency in performance, stronger plastics & lower weight.
